# FIRE RETARDANT

Angel's Distributing Inc., offers one of the most comprehensive lines of fire retardant drapery linings in the industry, from 100% cotton, 50/50 blends, 100% polyester both in regular linings and in light blocking fabrics. All of our fire retardant linings carry a certificate from each of the finishing mills showing that the fabric meets and exceeds all local and state fire codes by complying with the federal fire code, NFPA 701. We have linings that are chemically treated to retard the burn process and we have linings that are inherently fire retardant for customers who are allergic to chemicals or want to be able to wash the drapery fabric that the lining is married to.
